Content

- Bibliographic and citation databases
- Bibliometrics
 - Web of Science Core Collection
 - Scopus
 - Google Scholar
- Digital repositories
 - OpenDOAR
 - ROAR
- Conclusions

Questions

- Which bibliographic and citation databases are recognized in your country?
- Whose results you use in measuring and evaluating the scientific research work of individuals?
- What do you think about digital repositories?
- Is your university developing a digital repository?

Bibliographic and citation databases

- Bibliographic databases contain bibliographic data on a published work
 - Library catalogues (COBISS, OCLC)
- Citation databases add citation data to these bibliographic records

Bibliometrics

- Bibliometrics is a method that quantitatively studies sets of bibliographic records of human creativity.
- Bibliographic databases
 - some scientific fields,
 - nationally oriented (Chinese Science Citation Database),
 - comprehensive (WoS, Scopus, Google Scholar).

Web of Science Core Collection

- SCI (Science Citation Index Expanded) - covers the field of natural sciences;
- SSCI (Social Sciences Citation Index) - covers the field of social sciences;
- A&HCI (Arts and Humanities Citation Index) - covers the field of arts and humanities;
- Conference Proceedings Citation Index-Science - indexes proceedings from conferences in the field of natural sciences;
- Conference Proceedings Citation Index-Social Sciences & Humanities - indexes proceedings from conferences in the field of social sciences and humanities;
- ESCI (Emerging Sources Citation Index) - indexes journals that have not yet gone through the entire evaluation process.
- JCR;
- IF.

Scopus

- Elsevier
- SCImago Journal Rank (SJR)
- H-index
- SNIP

Serbian citation index - SCIndeks

The screenshot displays the SCIndeks website interface. At the top left is the logo for SCINDEKS Serbian Citation Index. To the right, there is a login section with fields for Username and Password, a 'Remember me' checkbox, and links for registration and password recovery. A navigation bar below the logo contains links for SEARCH, JOURNALS, MySELECTION, MySCIndeks, MyACCOUNT, MyJOURNAL, MyASSISTANT, FAQ, HELP, and ABOUT. On the far right of the navigation bar are icons for email, the Serbian flag, and the UK flag.

On the left side, there is a search panel with a dropdown menu for search types (basic, advanced) and several input fields for text searches in article titles, full-texts, and cited references, as well as name searches for authors.

The main content area features a central heading: "SCIndeks is the central hub of the integrated system of quality-controlled scientific publishing in Serbia: The joint venture of CEON/CEES and indexed journal publishers". Below this, a section titled "FUNCTIONS & FEATURES" lists ten items with corresponding icons: Availability, Visibility, Searchability, Normalization, Quality Control, Legitimacy, Promotion, Monitoring, and Evaluation.

Below the functions section is a diagram titled "SCINDEKS ENTITIES" represented as a grid of puzzle pieces. The entities are: JOURNALS, EDITORS, REVIEWERS, AUTHORS, PAPERS, CITATIONS, PROJECTS, INSTITUTIONS, and FUNDS. To the left of this grid are two columns of icons labeled "REPOSITORIES" (DOAJ, OpenAire, NaRDuS) and "DATABASES" (WoS/JCR, Scopus, MEDLINE). To the right are icons for "SERVICES" (ORCID, CrossRef, FundRef, CrossRef-DOI, MindTrap, P&LSS, RevRev, NormAll) and a section for "TOOLS & PROTOCOLS".

At the bottom left, there is a section titled "SCIndeks system at a glance" with a brief description: "To get the idea about elements, overmouse the icons."

Bibliometric analysis in Serbia

- The evaluation of scientific work in Serbia has been based on a system of reviews and the number of published papers for decades.
- The Rulebook on Categorization and Ranking of Scientific Journals.
- International scientific journal - referenced in the international citation databases Journal Citation Report and Web of Science or Scopus.

Conclusions

- Thanks to open and fast access to data, the exchange of scientific information is increasing.
- It contributes to better dissemination, visibility and evaluation of scientific information.
- Repositories provide better visibility of results in academic circles.
- They increase the visibility of the individual, their citation, and thus increase the visibility of the institution on the world academic network.
